FileFlow Feature Testing Checklist

Authentication & Security

- ☐ Login with username/password
- ☐ 2FA setup - generate QR code and verify TOTP code
- ☐ 2FA recovery codes - use one to bypass authenticator
- ☐ 2FA disable - requires password **and** a TOTP or recovery code; other sessions are logged out
- ☐ Recovery code regeneration - requires password **and** a TOTP or recovery code
- ☐ 2FA setup refused (400) while 2FA is already enabled
- ☐ Wrong password or code on disable/regenerate - generic error, HTTP 429 after 5 failures
- ☐ Session persistence - stay logged in after refresh
- ☐ Logout functionality - HTTP 200, `fileflow_token` and `fileflow_2fa_pending` cleared, also with an expired or revoked session
- ☐ Login lockout - 5 failures lock the IP and the (username, IP) pair for 15 min (HTTP 429)
- ☐ Login lockout - 5 failures from one IP do not lock the same account from another IP
- ☐ Login lockout - 50 failures on one account across all IPs lock it for 15 min; not reset by a successful login
- ☐ Deleted then recreated account - old session of the deleted account rejected

File Management

- ☐ List files/folders in directory
- ☐ Create new folder
- ☐ Upload single file
- ☐ Upload multiple files
- ☐ Download single file
- ☐ Delete file (move to trash)
- ☐ Rename file
- ☐ Copy file/folder
- ☐ Cut and paste file/folder
- ☐ Move file/folder with dialog
- ☐ Paths containing `..` rejected (HTTP 400)

Search & Filters

- ☐ Basic text search by filename
- ☐ Full-text search (search inside files)
- ☐ Toggle full-text on/off
- ☐ Filter by file type (all, documents, images, video, code, archive, audio)
- ☐ Sort results (relevance, name, modified, size)
- ☐ Clear filters button

Tags & Collections

- ☐ Add tags to single file
- ☐ Remove tags from file
- ☐ Add tags to multiple files (bulk)
- ☐ Search by tag (using #tag syntax)
- ☐ Display tags in preview panel

File Sharing

- ☐ Create share link with expiration
- ☐ Share link with password protection

- ☐ Copy share URL
- ☐ Delete share link
- ☐ View all shared links
- ☐ Public access to shared files (unauthenticated)
- ☐ Expired or unknown link - same HTTP 404 message
- ☐ Wrong link password 5 times - HTTP 429 for 15 min, even with the correct password
- ☐ Download-limited link (cap 1) - second download HTTP 404; parallel requests deliver the file once
- ☐ Download-limited link with Range header - whole file returned (200) and counted; uncapped link returns 206
- ☐ Rename/move shared file - link still works; delete it - link returns 404 and is removed
- ☐ Creator disabled or loses read access - link returns 404; works again once access is restored

Collaboration

- ☐ Create shared folder
- ☐ Add members to shared folder
- ☐ Remove members from shared folder
- ☐ Access shared folder as different user
- ☐ Creating a shared folder requires the creator's own read access (not via a received share)
- ☐ Granting write to a member requires the creator's own write access
- ☐ Creator loses rights - members lose the same rights immediately
- ☐ Delete shared folder

Upload Requests

- ☐ Create upload request link
- ☐ Set expiration on upload request
- ☐ Protect with password
- ☐ View all upload request links
- ☐ Public upload to request folder
- ☐ Creating an upload request requires own write access (read-only user / share recipient refused, 403)
- ☐ Existing file name - new upload saved as `name (1).ext`, never overwritten
- ☐ Files sent before the password field are refused; nothing written
- ☐ Wrong upload password 5 times - HTTP 429
- ☐ Upload above `PUBLIC_UPLOAD_MAX_MB` (default 100) refused, no leftover files
- ☐ Creator loses write access - link returns 404
- ☐ Rename/move target folder - request follows; delete folder - request removed
- ☐ Delete upload request link

File Preview & Viewing

- ☐ View image files
- ☐ Preview PDF files
- ☐ Preview text files
- ☐ Preview markdown with rendering
- ☐ Preview CSV with table display
- ☐ Syntax highlight code files (JS, Python, etc.)
- ☐ View file info (size, modified date)

Trash & Versions

- ☐ Move to trash
- ☐ List trash contents

- ☐ Restore from trash
- ☐ Empty trash
- ☐ View version history
- ☐ Restore old file version

Storage Management

- ☐ View storage quota widget
- ☐ See used vs total space
- ☐ Color warning at 80% usage
- ☐ Color critical at 95% usage

Admin Features

- ☐ Create new user
- ☐ Edit user (disable, quota, role)
- ☐ Delete user
- ☐ Last active admin cannot be demoted, disabled or deleted (HTTP 400); a disabled admin does not count
- ☐ Create group with permissions
- ☐ Edit group (paths, permissions)
- ☐ Delete group
- ☐ View audit logs
- ☐ Filter audit logs

UI/UX

- ☐ Grid view for files
- ☐ List view for files
- ☐ Theme switching (dark, light, corporate, fileflow)
- ☐ Language switching (EN, FR)
- ☐ Responsive design
- ☐ Keyboard shortcuts (Ctrl+F for search, Esc to close)

Downloads

- ☐ Download single file
- ☐ Bulk download multiple files as ZIP
- ☐ Preserve folder structure in ZIP

Edge Cases

- ☐ Large file upload (>1GB)
- ☐ Many files in directory (100+)
- ☐ Concurrent uploads
- ☐ Recover from network error
- ☐ Path with special characters
- ☐ Empty folders
- ☐ Hidden files

Last updated: 2026-10-27 (Driss OUAAZIZ) - security fixes of the October 2026 audit (2FA step-up, logout, login lockout, last admin guard, public link throttling, download caps and Range, link lifecycle, upload request rules)
